About Us | Brief Overview

Automation & Control Company Limited (ACCL) is a leading provider of cutting-edge industrial automation, control systems, and instrumentation solutions. With a strong focus on engineering excellence, we specialize in designing, upgrading, and integrating advanced control systems, including PLCs, RTUs, and HMIs. Our services encompass system design, installation, maintenance, and trading of high-quality industrial materials and instruments. By leveraging the latest technologies, we ensure optimized system performance, enhanced safety, and compliance with international standards such as IEC and ISO. Our expertise extends to electrical low voltage distribution systems, communication networks, and process automation, making us a trusted partner across industries such as oil & gas, utilities, and manufacturing.

At ACCL, we are committed to innovation, reliability, and customer satisfaction. We collaborate closely with clients to provide tailored solutions that improve efficiency and operational excellence. Our dedicated team of engineers, project managers, and technical experts continuously strive to stay ahead of industry advancements. We empower industries to achieve sustainable growth and long-term success.

Vision

At ACCL, we embrace the future of control systems and instrumentation, aiming to be a trusted partner by delivering advanced, reliable solutions that ensure client success through superior, timely, and cost-effective results.

Mission

To be a trusted leader in automation and control solutions, empowering industries with innovative, reliable, and sustainable technologies that enhance efficiency, safety, and operational excellence in an ever-evolving industrial landscape.

Delivering innovative automation solutions with excellence & reliability.

Leveraging cutting-edge technology for continuous improvement and growth.

Dedicated to delivering reliable, customer-focused, high-quality solutions.

Expert engineers ensuring precision, compliance, and advanced system integration.

Our Values | In the Company

At ACCL, we prioritize trust, innovation, and excellence in all we do. Our core values reflect our commitment to delivering top-tier solutions for control systems and instrumentation. We focus on understanding clients' needs, driving expertise, and fostering continuous innovation. Our goal is to exceed expectations, build lasting relationships, and shape the future of control system solutions for our clients.

COMMITMENT TO EXCELLENCE

We deliver innovative control solutions with the highest quality standards, ensuring every project exceeds expectations through precision, efficiency, and outstanding performance.

CUSTOMER-CENTRIC APPROACH

We prioritize understanding client needs, offering personalized, tailored solutions to build lasting relationships and deliver exceptional value through dedicated, customer-focused services.

EXPERTISE & INNOVATION

Our skilled professionals leverage cutting-edge technology and industry best practices, combining expertise and innovation to provide cost-effective, efficient automation and control solutions.

OUR DEDICATION

our passionate team is committed to engineering excellence, continuous improvement, and innovation to meet evolving client needs across diverse industries with expertise and dedication.

Empowering Innovation, Delivering Excellence in Control Systems Solutions.

Message from the CEO

Shaping the future of automation with innovative solutions, customer focus, sustainability, and empowered, skilled teams.

Empowering industries through cutting-edge automation solutions, prioritizing customer-centricity, sustainability, and innovation. Our skilled team drives progress, delivering reliable, efficient systems that enhance productivity, safety, and value, shaping the future of automation worldwide.

Automation & Control Company Limited

Dear Valued Customers, Partners, and Team Members,

As the CEO of ACCL (Automation & Control Company Limited), I am proud to lead a company that is shaping the future of automation and control systems. Our mission is simple yet profound: to empower industries with cutting-edge solutions that enhance productivity, reliability, and sustainability.

In a world driven by rapid technological advancements, the demand for smarter, safer, and more efficient systems has never been greater. At ACCL (Automation & Control Company Limited), we are committed to staying ahead of the curve, leveraging the latest innovations in artificial intelligence, IoT, robotics, process Automation, advanced Instrumentation and control systems to transform the way industries operate.

Our success is built on three core pillars:

1. Customer-Centric Solutions: Every product and service we offer is designed with our customers in mind. Your trust inspires us to push boundaries and deliver solutions that meet and exceed expectations.

2. Sustainability and Innovation: As stewards of progress, we are dedicated to creating solutions that not only improve operational efficiency but also contribute to a more sustainable future for generations to come.

3. Empowering Talent: Our team of passionate and skilled professionals is our greatest asset. Their commitment to excellence fuels our ability to innovate and deliver results that matter.

As we continue to navigate a rapidly evolving landscape, we remain steadfast in our commitment to helping our partners achieve operational excellence. Together, we will harness the power of automation and control to unlock new opportunities, improve safety, and create lasting value for businesses and communities worldwide.

Thank you for being part of our journey. I look forward to continuing to work with you as we pioneer new possibilities and redefine the future of automation and control Systems.

With gratitude and optimism,

CEO

ACCL- Automation & Control Company

Our Services | Driven by Innovation

ACCL offers services including engineering and design of control systems, system upgrades, trading of industrial materials, installation of control panels, electrical distribution systems, and maintenance services. We provide custom solutions, integration, quality assurance, and ongoing support for optimized performance and reliability.

**Engineering & Design
Services for Instruments
and Control Systems**

**Upgrading and
Modernization of
Existing Control Systems
and Instrumentation**

**Trading of Industrial
Materials, Instruments,
Fittings, and Control
Systems**

**Communication and
Networking Solutions**

**Electrical Low Voltage
Distribution System**

**Installation Services of
Instruments and Control
System Panels**

**PANEL ASSEMBLY FOR
CONTROL PANELS**

**MAINTENANCE SERVICES OF
INSTRUMENTS & CONTROL
SYSTEMS**

Reliable Industrial Solutions

ACCL offers precision engineering and reliable industrial solutions, ensuring high-quality service with advanced technology and expert teams, committed to optimizing your operations for maximum efficiency and performance.

INNOVATIVE
SOLUTIONS, RELIABLE
RESULTS

Delivering cutting-edge technology and dependable services to enhance your business performance.

Providing reliable industrial solutions with advanced technologies, precision engineering, and exceptional customer service.

Engineering & Design Services | Instruments & Control Systems

Our engineering and design services include the creation of customized instrumentation and control systems, from initial concept to final implementation. Our team specializes in designing control panels, automation systems, and instrumentation solutions to suit your specific industrial needs. We focus on optimizing system performance, reliability, and energy efficiency to meet client specifications and regulatory standards.

01. Control Systems Design &

Detailed design of control systems, including instrumentation, PLC programming, SCADA systems, and safety controls.

02. Technical Drawings Preparation

Preparation of technical drawings, P&IDs (Piping & Instrumentation Diagrams), and electrical schematics for system layout.

03. Instrument & Hardware Selection

Selection of appropriate instruments, controllers, and hardware to meet the client's operational requirements.

04. Workflow Automation

Development of control strategies and automation workflows to optimize system performance.

05. Design Testing & Simulation

Testing and simulation of designs to ensure they meet the performance criteria before full implementation.

06. Standards Compliance

Compliance with industry standards & local regulations throughout the design & implementation process.

Upgrading and Modernization | Existing Control Systems and Instrumentation

At ACCL, we provide comprehensive engineering and design services for control systems and instrumentation, tailored to meet the unique needs of our clients. Our team of experts works closely with clients to deliver solutions that ensure optimal performance, reliability, and efficiency in their operations.

Custom Engineering & Design: We design and engineer control systems and instrumentation tailored to your operational requirements. Our solutions are scalable, efficient, and built to meet both industry standards and specific project needs.

System Integration & Upgrades

→ System Integration

We integrate complex control systems and instruments into existing processes, ensuring seamless operations and improved efficiency. Our team ensures that all components work together cohesively for maximum performance.

→ Upgrading Existing Systems

We upgrade and modernize outdated control systems, integrating the latest technology and standards to enhance performance, reliability, and security for improved operational efficiency.

Upgrading Process

- **Assessment and Diagnostics:** Thorough evaluation of existing systems to identify inefficiencies, and areas for improvement.
- **Replacement of Obsolete Equipment:** Upgrading outdated hardware & software to improve functionality & reduce costs.
- **Improved Integration:** Ensuring new equipment integrates smoothly with existing systems, minimizing downtime and maximizing operational efficiency.
- **Compliance with Modern Standards:** Ensuring that upgraded systems meet current safety, regulatory, & performance standards.

Documentation and Reporting

We provide complete, detailed documentation for all designs and modifications, ensuring clear and accurate records for future reference and compliance.

Consultation and Support

We offer expert consultation services throughout the design and implementation phases, providing guidance on system optimization, scalability, and long-term support.

Trading | Industrial Materials, Instruments, & Fittings

At ACCL, we specialize in the trading of high-quality industrial materials, instruments, fittings, and advanced control systems. We source products from leading manufacturers globally, ensuring that our clients have access to reliable, durable, and innovative solutions

for their operations. Whether you're in manufacturing, construction, energy, or automation, we provide the materials and systems you need to optimize performance, efficiency, and safety.

We offer a broad range of industrial materials, precision instruments, and fittings designed to meet the demands of various industries. Our products include:

- **Industrial Materials:** Pipes, valves, tubing, fasteners, seals, and other essential components for industrial processes and systems.
- **Instruments and Fittings:** Precision instruments such as pressure gauges, flow meters, temperature sensors, level indicators, and a variety of fittings designed for seamless integration into systems.
- **Customization & Consultation:** We collaborate with clients to understand their specific requirements, offering tailored solutions and expert consultation to select the most suitable products for their projects.
- **Global Sourcing & Local Availability:** Through strong partnerships with international manufacturers, we provide globally sourced materials that are readily available locally, ensuring fast delivery times and reduced lead times.

Control Systems | PLC, RTU, HMI

Our extensive range of control systems includes Programmable Logic Controllers (PLC), Remote Terminal Units (RTU), and Human-Machine Interfaces (HMI), designed to streamline operations and improve automation efficiency. Our control system offerings include:

PROGRAMMABLE LOGIC CONTROLLERS

A variety of PLCs for industrial automation applications, designed to control machinery, processes, and robotic systems with efficiency.

REMOTE TERMINAL UNITS(RTU)

Systems for remote monitoring and data acquisition, ideal for industries such as oil and gas, power generation, and water treatment.

HUMAN-MACHINE INTERFACES(HMI)

User-friendly interfaces that allow operators to interact with and control systems, providing real-time monitoring and diagnostics for enhanced operational control.

TAILORED SOLUTIONS

We work with clients to identify the best control systems suited to their needs, whether it's for automation, monitoring, or data collection, ensuring seamless integration and peak performance.

INTEGRATION SUPPORT

Beyond supplying products, we offer full integration services, including installation, configuration, and testing, ensuring smooth and efficient operation of your control systems.

TECHNICAL TRAINING

Our team provides ongoing technical support and training, helping clients optimize the use of their control systems and ensuring long-term operational efficiency.

COMPLIANCE WITH INDUSTRY STANDARDS

All systems comply with international safety, quality, and performance standards, guaranteeing reliable and safe operations.

Communication and Networking

At ACCL, we provide a full range of communication and networking solutions to help businesses build robust, secure, and efficient communication infrastructure. Our services are designed to ensure seamless data exchange, improve connectivity, and enhance operational performance across various industries, including manufacturing, construction, energy, and more.

*Optimizing connectivity and security
with customized communication and
networking solutions for operations.*

Our Services Include

NETWORK DESIGN AND IMPLEMENTATION

We design and implement customized network solutions, including local area networks (LAN), wide area networks (WAN), and wireless communication systems. Our network designs are scalable and adaptable to meet the growing needs of businesses.

DATA AND VOICE COMMUNICATION SYSTEMS

We offer integrated solutions for both data and voice communication, ensuring clear, uninterrupted, and secure communication across all levels of your organization. Our solutions include VoIP (Voice over Internet Protocol) systems, telecommunication systems, and unified communications.

FIBER OPTIC AND COPPER CABLING

We install high-speed fiber optic and copper cable systems for seamless data transmission. Our network infrastructure is designed for efficiency and reliability, with redundancy and failover mechanisms in place to ensure continuous connectivity.

WIRELESS NETWORKS AND SOLUTIONS

We provide cutting-edge wireless solutions, including Wi-Fi networks, remote access, and secure VPN services. Our wireless systems are optimized for performance and security, ensuring reliable communication in large-scale industrial and office environments.

NETWORK SECURITY AND MONITORING

We design and deploy secure networking systems with advanced security protocols, including firewalls, encryption, and intrusion detection systems (IDS). Additionally, we offer network monitoring services to detect, troubleshoot, and resolve issues proactively, minimizing downtime.

SYSTEM INTEGRATION

We ensure seamless integration of communication and networking systems with your existing infrastructure, helping to enhance performance, reliability, and ease of operation. Whether for internal communication or data exchange across multiple locations, we deliver solutions that align with your operational goals.

ONGOING SUPPORT & MAINTENANCE

To ensure the continued performance of communication and networking systems, we offer ongoing maintenance, technical support, and upgrades. Our team is available to address any issues, troubleshoot problems, and provide updates to ensure your systems remain up to date and fully functional.

Electrical Low Voltage Distribution System

Safe, efficient, and sustainable low voltage power distribution for industrial, commercial, and residential projects.

ACCL offers expert services in designing, supplying, installing, and maintaining electrical low voltage (LV) distribution systems. Our LV systems are designed to distribute electrical power safely and efficiently across industrial, commercial, and residential projects. We specialize in delivering reliable, cost-effective solutions for power distribution that comply with international standards and meet client-specific needs.

Our Electrical Low Voltage Distribution System Services Include

- **System Design and Engineering:** We provide end-to-end design services for electrical low voltage distribution systems, including load analysis, system layout, circuit protection, and cable sizing. Our designs ensure safe, reliable, and efficient power distribution tailored to your project requirements.
- **Supply of Electrical Components:** We supply a wide range of electrical components for low voltage systems, including circuit breakers, distribution boards, transformers, switchgear, and busbars. We source high-quality, reliable components that meet the necessary performance and safety standards.
- **Panel Construction and Installation:** We offer custom panel assembly services, including the construction and installation of electrical control panels, switchboards, and distribution boards. Our panels are built with the highest standards of quality and safety, ensuring that your electrical systems operate efficiently and safely.

Reliable electrical distribution ensuring performance, safety, and energy efficiency for modern infrastructure and industries.

- **Power Distribution and Protection:** We provide end-to-end design services for electrical low voltage distribution systems, including load analysis, system layout, circuit protection, and cable sizing. Our designs ensure safe, reliable, and efficient power distribution tailored to your project requirements.

- **Testing and Commissioning:** We conduct thorough testing and commissioning of electrical low voltage systems to ensure compliance with safety regulations and optimal performance. Our commissioning process includes checking all electrical connections, conducting safety tests, and verifying system functionality before handing it over for use.
- **Maintenance and Troubleshooting:** We offer regular maintenance services to ensure the longevity and efficient operation of your low voltage distribution system. Additionally, we provide troubleshooting and repair services for any issues that may arise, minimizing downtime and keeping your systems running smoothly.
- **Energy Efficiency and Sustainability:** We design and implement energy-efficient solutions that reduce power consumption and operational costs. Our focus on sustainability includes using energy-saving components and systems that align with modern energy conservation standards.

Installation Service | Instruments & Control System Panels

At ACCL, we offer professional installation services for a wide range of industrial instruments and control system panels. Our experienced team ensures that all components are installed accurately and efficiently, adhering to the highest safety standards and industry best practices. We focus on delivering reliable, cost-effective, and high-performance systems that are ready for immediate use.

OUR INSTALLATION SERVICES INCLUDE:

The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed.

01 Comprehensive Site Evaluation

Optimized configurations for maximum efficiency, reliability, and seamless control panel integration.

Before installation, we conduct a thorough site assessment to understand the specific needs of the project. This helps us determine the best configuration for the instruments and control panels, ensuring maximum efficiency and reliability.

02 System Setup & Integration

Smooth installation, wiring, and connectivity for high-performance

Our team manages the entire installation process, including setting up control panels, wiring, and connecting instruments to existing systems. We ensure that all components are integrated seamlessly, optimizing performance and minimizing system downtime

03 Electrical Wiring and Commissioning

Expert wiring, testing, and commissioning to ensure fully operational, safe, and efficient systems..

We provide professional electrical wiring and commissioning services, ensuring that all instruments, control panels, and electrical components are connected correctly, tested, and ready for operation.

Precision installation of industrial instruments and control panels, ensuring seamless integration, compliance, reliability, and optimal performance for efficient operations.

04 Compliance with Standards

Ensuring safety, reliability, and full adherence to international and local regulations.

All installation services adhere to relevant international and local electrical and safety standards. We ensure that all installations meet regulatory requirements, ensuring safety and compliance.

05 Testing and Calibration

Verifying performance, and system functionality for optimized operations.

After installation, we conduct thorough testing and calibration to verify that the instruments and control systems operate within the required parameters. This ensures optimal system functionality from day one.

06 Handover and Training

Equipping teams with knowledge and documentation for efficient system operation and maintenance.

Once installation is complete, we provide training to your team on the proper operation and maintenance of the systems. We also offer detailed documentation for future reference.

At ACCL, we provide professional installation services for industrial instruments and control system panels. Our expert team ensures precise setup, seamless integration, and compliance with industry standards for maximum efficiency and reliability. We focus on delivering high-performance, cost-effective solutions tailored to your operational needs.

Our services include site evaluation, system integration, wiring, testing, and calibration. We ensure all components are installed correctly and meet safety regulations. Additionally, we provide hands-on training and detailed documentation, enabling smooth system operation and maintenance.

Panel Assembly | Control Panels

At ACCL, we specialize in the assembly of high-quality control panels tailored to meet the unique requirements of your industrial and commercial operations. Our custom-built control panels are designed to ensure smooth operation, safety, and efficiency across a variety of applications, including automation, process control, and instrumentation systems.

OUR PANEL ASSEMBLY SERVICES INCLUDE:

- **Custom Panel Design:** We offer custom design solutions for control panels, ensuring that all components, including switches, circuit breakers, relays, and monitoring devices, are precisely configured to meet your specific operational needs.
- **High-Quality Components:** We source only the highest quality components for panel assembly, including PLCs, HMIs, RTUs, sensors, and other control instruments. Our components are selected for their reliability, durability, and compliance with international safety standards.
- **Wiring and Integration:** We handle all aspects of wiring and integration for control panels, ensuring that all electrical connections are made securely and safely. Our team ensures that the panels are organized, labeled, and ready for seamless installation.
- **Testing & Quality Assurance:** Each control panel undergoes rigorous testing and quality control processes to ensure that it meets operational requirements and industry standards. This includes functional testing, continuity checks, and verifying that all components are working as intended.
- **Compliance with Industry Standards:** Our panels are designed and assembled in compliance with relevant international standards such as IEC, UL, and ISO, ensuring safety, quality, and reliability.

Maintenance Services | Instruments & Control Systems

We understand the critical role that instruments and control systems play in maintaining the efficiency and reliability of your operations. At ACCL, we provide comprehensive maintenance services to ensure that your systems continue to function optimally and without interruption.

OUR MAINTENANCE SERVICES INCLUDE:

- **Preventive Maintenance:** We offer scheduled preventive maintenance services to help identify potential issues before they cause system failures. This includes routine inspections, cleaning, calibration, and testing of instruments and control systems to ensure their continued performance.
- **Corrective Maintenance:** In the event of system failures or malfunctions, our team provides prompt and effective corrective maintenance services. We quickly diagnose issues, repair faulty components, and restore your systems to full functionality, minimizing downtime.
- **Upgrades & System Enhancements:** We also offer upgrades and enhancements for existing systems, ensuring that your instruments and control systems are always up to date with the latest technologies. This includes upgrading software, replacing outdated hardware, and improving system capabilities to meet evolving operational demands.
- **Calibration & Performance Optimization:** Regular calibration of instruments is crucial for maintaining accuracy and precision in your processes. Our team ensures that all measuring instruments and control systems are calibrated according to industry standards, optimizing their performance for greater reliability and efficiency.
- **Remote Monitoring & Support:** We provide remote monitoring services to keep track of the health and performance of your instruments and control systems. This allows us to identify potential issues early and provide support without the need for on-site intervention.
- **Emergency Repairs:** In the event of a breakdown or urgent need, we offer emergency repair services to minimize downtime and restore operations as quickly as possible. Our team is available for 24/7 support to address critical issues.
- **Training & Documentation:** We provide training on the maintenance and proper handling of instruments and control systems, ensuring that your team is equipped with the knowledge and skills to perform basic maintenance tasks. Additionally, we offer detailed documentation for reference.

Health, Safety, and Quality Standards

At ACCL, we are committed to maintaining the highest standards of health, safety, and quality across all our operations. By adhering to both local and international best practices, we ensure that our employees, clients, and stakeholders are protected while delivering exceptional, reliable, and efficient solutions. We integrate safety and quality into every project phase to guarantee that both are continuously upheld to the highest level.

Key Commitments

1. Commitment to Excellence:

We deliver innovative solutions with strict adherence to safety standards, ensuring every project meets client expectations and international compliance requirements.

2. Workplace Safety:

We implement safety protocols aligned with ISO 45001 to create secure, hazard-free work environments, ensuring employee well-being & full compliance with global safety standards.

3. Risk Assessment & Management:

Comprehensive risk assessments identify potential hazards, implementing proactive measures aligned with ISO 31000 to ensure safety, efficiency, and reliability in all project phases..

4. Quality Control Processes:

We maintain strict quality control through testing, inspections, and validations, ensuring reliable products, optimized performance, and client satisfaction in every project.

5. Employee Training & Development

Continuous training on ISO 45001 & ISO 9001 ensures

our team stays updated on the safety regulations, quality standards, & industry advancements for optimal performance.

6. Emergency Preparedness

We establish well-documented emergency procedures & conduct regular drills, ensuring an rapid response to workplace incidents while prioritizing employee & client safety.

7. Sustainability Responsibility

By adhering to ISO 14001 standards, we integrate sustainable practices, reducing environmental impact while ensuring safe, eco-friendly, and efficient operations across all projects.

8. Client Collaboration & Feedback

We actively engage clients, ensuring solutions meet specific needs while maintaining compliance with international safety, quality, & environmental standards for project outcomes.

7. Continuous Improvement

We consistently refine safety & quality processes, utilizing client feedback and industry updates to maintain ISO 9001 & ISO 45001 compliance while improving operational efficiency.

Our Clients | Trusted Partners

OUR COMMITMENT TO EXCELLENCE

1. Internal System Development Projects

- Our team is currently working on the development of in-house control systems, including PLC, RTU, and HMI configurations, to ensure top-notch system functionality for future clients.

2. Staff Training & Skill Development

- We are investing in the continuous training and certification of our team members to ensure we meet the highest standards of service in instrumentation, control systems, and automation.
- Ongoing participation in workshops, seminars, and industry-specific events to keep up-to-date with the latest technologies and trends.

3. Partnership and Vendor Collaborations

- We are in discussions with key industry partners and suppliers to secure resources and equipment for upcoming projects, ensuring we are prepared for larger-scale contracts as soon as they arise.

4. Proposal and Tender Submissions

- Actively bidding on several large-scale projects within industries such as manufacturing, oil & gas, and utilities, with expected commencement in the near future.

5. Product and Service Development

- Developing new service offerings and refining existing products to cater to emerging client needs and industry demands, ensuring we stay competitive and innovative.
